PROJECT DETAILS:

Project Title	ROVER- A VR Motion Gaming Suit
Team Members	1
Tools & Software used	Arduino microcontrollers & Arduino IDE
Description	▪ ROVER is a motion gaming controller for shooting games. ▪ It is Arduino and IMU-based suit. It has a vest with types of tactical equipment attached to it. It has two guns for switching weapons in games. The information is then sent to a computer that translates the data into the game movements through Arduino pro micro. Some vibrating sensors are also installed to feel the impact of grenades.

Project Title	iNotes - Your notes on cloud
Team Members	1
Tools & Software used	Visual Studio Code
Description	- I spearheaded the development and implementation of iNotes, a cutting-edge cloud-based note-taking platform. - iNotes revolutionizes the way users capture, organize, and access their notes seamlessly across devices. - By leveraging cloud technology, iNotes ensures real-time synchronization, making notes available on smartphones, tablets, and computers.

GENERIC SKILLS:

- **Management**- Gathered people with different ideas to make intercollegiate event possible.
- **Smart Work**- Completed the task with combining new ideas in efficient aspects.
- **Team Work**- Worked for college Magazine in team for two years.
- **Good Observer-** Always seeking for new information.
- **Project Coordinator-** Helped college students for developing their college project.

EXTRA CURRICULAR ACTIVITIES:

- Attended a week training at **"The Electric Loco Shed", AJNI, NAGPUR.**
- Received Best Performance Award in "**IOT"** held by "**L-TECH LABS, WARDHA".**
- Actively participated & organized college technical events.
- Worked with the Non-Government Organization (NGO) named as **"ROTARY CLUB".**
